PRODEK - Monofilament Polypropylene Suture

- w Monofilament Polypropylene suture B.P., Blue
- w Type - Non-absorbable synthetic material.
- w Prodek is available in a range of gauge sizes and lengths, non-needled or attached to stainless steel needles of varying types and sizes.
- w Inert - Minimal tissue reaction.
- w Very smooth for easy passage through tissue.
- w Very pliable - good handeling.
- w Easy knot tying, excellent knot security.
- w Even in infected tissue, polypropylene provides long term strength retention.
- w Uses - Polypropylene is intended for use in procedures where a smooth monofilament suture offering very long term support is required.
- w Sterilised by Ethylene Oxide
- w Prodek sutures from Sutures Ltd. are guaranteed to meet the general requirements of the British Pharmacopoeia (B.P.), the European Pharmacopoeia (Ph.Eur.), and the United States Pharmacopoeia (U.S.P.)
