

SURGISILK - Braided Silk S.P. (Black or White)

W NEEDLED SILK SUTURE S.P., W500.
W NEEDLED SILK SUTURE S.P., W500.

Individual filaments of the highest quality silk are specially treated, including degumming, to give good handling properties. Its filaments are then twisted together and braided. The braid is made up of a core of twisted silk around which a cover is placed. Processes are applied to ensure regular surface smoothness and the best extension for good knotting characteristics.

W Needles are available in various sizes and lengths. Needles are available in stainless steel or titanium. Needles are available in various sizes and lengths. Needles are available in stainless steel or titanium.
